

CLEAN COPY OF SPECIFICATION PARAGRAPHS

[00018] Figures 3A to 3I are a series of bar graphs presenting cytotoxicity results from a nomoner PS-SCL screening assay. Figures 3A through 3I present data from peptide positions 1 through 9, respectively. The residue present in the native sequence at each position is represented by a hatched bar, while the remaining amino acids are represented by solid bars.

[00020] Figures 5A and 5B are a pair of bar graphs providing data regarding HCMV CTL epitope recognition by HCMV seropositive donors.

[00021] Figures 6A to 6C provide data regarding the recognition of three different CTL peptide analogs by HCMV seropositive donor CTL.
